HELENPAYNE

OPEN-SOURCE AUTOMATION & LINUX NETWORKING

GitHub: github.com/helenpayne | Application: OmniRush AI

PROFILE

Technology enthusiast and open-source contributor with public projects focused on Shell scripting, CI workflows, Linux networking tools and embedded router firmware build automation.

TECHNICAL FOCUS

Shell scripting / GitHub Actions / Linux / OpenWrt
Network tunneling tools / CI automation / Build workflows

SELECTED PUBLIC GITHUB PROJECTS

NPS-Action

github.com/helenpayne/NPS-Action
Shell-based repository for NPS-related network automation work.

NPS-Action2

github.com/helenpayne/NPS-Action2
Related Shell project exploring NPS automation workflows.

Actions-OpenWrt-GF-WPR003N-16MB

github.com/helenpayne/Actions-OpenWrt-GF-WPR003N-16MB
GitHub Actions workflow for OpenWrt firmware compilation, based on the community-maintained Actions-OpenWrt template.

INTERESTS AND WORKING STYLE

Learning through practical experiments with repeatable Linux builds, networking configurations, CI execution and troubleshooting.

WHY I AM APPLYING TO OMNIRUSH

I hope to explore state-of-the-art AI models for understanding codebases, reviewing automation scripts, debugging Linux network configurations, and developing reliable engineering workflows. I can offer grounded feedback from real-world open-source and hands-on experiments.
